EDUCATION

Manipal University Jaipur Computer Science and Engineering (core) Bachelors CGPA: 8.9	Jaipur 2023 - 2027
KC college Science Junior College	Mumbai 2021 - 2023
Gopi Birla Memorial School Primary Schooling Percentage: 94.6%%	Mumbai upto - 2021

EXPERIENCE

Finalyca Software Engineer Intern Underwent hands-on training to understand real-world corporate workflows, team collaboration, and workplace protocols and dynamics. Engineered automated data transformation pipelines, converting unstructured Excel files into clean, analysis-ready formats with minimal manual intervention. Developed a robust smart Excel parser at a dynamic startup using Python and the Pandas framework to automate complex data extraction and processing tasks. Implemented comprehensive error handling and data validation mechanisms to ensure reliability and integrity across diverse datasets. Collaborated with the core development team to streamline data workflows, significantly improving processing speed and operational efficiency.	Mumbai June - July 2022
Miso Frontend Developer Intern Spearheaded the development of responsive web interfaces at a fast-paced startup, leveraging modern frontend technologies and industry best practices. Integrated Firebase for seamless real-time data synchronization and secure user authentication workflows. Engineered scalable and maintainable design systems using Tailwind CSS for consistent UI/UX across the application. Collaborated closely with cross-functional teams, ensuring timely delivery of high-quality web solutions aligned with business goals.	Remote July - September 2024

SKILLS

Programming Languages:	Python, C, C++, HTML, CSS, Javascript
Libraries/Frameworks:	Pandas, Numpy, Matplotlib, MERN stack
Tools / Platforms:	Git, VS code, Jupyter, Google Colab
Databases:	Oracle SQL, MYSQL, SQL, MongoDB

PROJECTS / OPEN-SOURCE

Expense Splitter (Group Expense Manager)

Web app to manage shared expenses among groups with secure user authentication.
Designed and implemented a normalized relational DBMS schema to manage users, groups, and shared expenses, integrating SQL queries for efficient data retrieval, consistency, and transaction handling.
Automated balance calculation to simplify settlements between members.
Built a responsive UI for real-time expense tracking.
Added settlement history and downloadable reports for transparency

Diamond Price Predictor (ML Regression Project)

Machine learning model to predict diamond prices using carat, cut, clarity, and color.
Applied preprocessing with normalization and encoding of categorical features.
Trained regression models (Linear Regression, Random Forest) for accurate predictions.

Evaluated results using R score and error metrics.

Attendance tracking app

Secure attendance system using dynamic QR codes refreshing every 5 seconds.

Integrated scanning module for students to log attendance in real time.

Implemented backend validation to prevent proxy or duplicate entries.

Stored verified attendance logs in a database for easy reporting.

CERTIFICATIONS

- Software Development Intern Role Certification - **HackerRank**
- Data Structures and Algorithms in C/C++ - **Pregrad**
- Advanced Data Structures and Algorithms - **CodeChef**
- Design and Analysis of Algorithms certification - **NPTEL**
- Solutions Architecture Job Simulation - **Amazon AWS**
- Data Analytics Job Simulation - **Delloite**
- Software Engineering Job Simulation - **JP Morgan**

HONORS & AWARDS

- Achieved Dean's List recognition for maintaining a GPA above 9.0 for four semesters, showcasing consistent academic excellence.
- Awarded Certificate of Excellence for outstanding performance during internship at Finalyca.
- Active member of ACM Club, responsible for organizing, managing, and hosting various campus events and student activities.
