

KRISH MAHESHWARI

Data Engineer | Full-Stack Developer | Data Analyst
krishmaheshwari111@gmail.com | 9867773042 | Mumbai 400026
Portfolio | LinkedIn | GitHub | LeetCode

EDUCATION

Manipal University Jaipur Computer Science and Engineering (core) Bachelors CGPA: 9.2	Jaipur 2023 - 2027
KC college Science Junior College	Mumbai 2021 - 2023
Gopi Birla Memorial School Primary Schooling Percentage: 94.6%	Mumbai upto - 2021

EXPERIENCE

Altus Corp Full-Stack Developer Intern (App & Web) - Designed and developed end-to-end web and mobile applications for diverse client portfolios, translating business requirements into scalable, production-ready solutions. - Built responsive client-facing websites using React and Tailwind CSS, integrating backend via Supabase and APIs for real-time data layers to deliver seamless user experiences. - Developed cross-platform mobile applications, collaborating directly with clients to gather requirements, iterate on UI/UX designs, and ship polished deliverables. - Managed full project lifecycle from requirement gathering and architecture design to deployment, ensuring timely delivery and client satisfaction.	Mumbai June 2025 – Present
Finalyca Data Engineer Intern - Engineered automated data transformation pipelines, converting unstructured Excel files into clean, analysis-ready formats with minimal manual intervention. - Designed and implemented a smart Excel parser using Python and Pandas to automate complex data extraction, reducing manual effort and improving data accuracy. - Applied data engineering best practices including schema design, error handling, and validation mechanisms to ensure reliability and integrity across diverse datasets. - Collaborated with the core engineering team to optimize data workflows, significantly improving pipeline processing speed and overall operational efficiency.	Mumbai June – July 2025
Miso Frontend Developer Intern - Spearheaded the development of responsive web interfaces at a fast-paced startup, leveraging modern frontend technologies and industry best practices. - Integrated Firebase for seamless real-time data synchronization and secure user authentication workflows. - Engineered scalable and maintainable design systems using Tailwind CSS for consistent UI/UX across the application. - Collaborated closely with cross-functional teams, ensuring timely delivery of high-quality web solutions aligned with business goals.	Remote July - September 2024

SKILLS

Programming Languages:	Python, C, C++, JavaScript, HTML, CSS, Go
Libraries/Frameworks:	Pandas, NumPy, Matplotlib, Seaborn, React, Node.js, Django, Tailwind CSS
Data Engineering:	SQL, MySQL, MongoDB, Data Pipelines, ETL, Feature Engineering
Tools / Platforms:	Power BI , MS Excel, Git, Google Colab, VS Code, Firebase, Supabase

PROJECTS / OPEN-SOURCE

CredVeda Real-Time Credit Intelligence Platform Link - Machine learning model that predicts borrower creditworthiness using financial, behavioral data. - Applied preprocessing, feature selection, and training of models (Logistic Regression, Random Forest, and Neural Network).
--

- Designed an intuitive Flask dashboard with integrated chatbot for personalized financial guidance.
- Helps borrowers assess the credit score and trustworthiness of other companies or individuals before lending..

STEM QUEST Gamified Learning Platform for Rural Education | [Link](#)

- Gamified web platform designed to make STEM learning engaging and accessible for rural students (Grades 612).
- Integrated AI-driven adaptive learning using Fuzzy Logic and Neural Networks to evaluate understanding and recommend next topics.
- Implemented interactive quiz modules and progress tracking through engaging game formats that motivate students to play repeatedly, fostering curiosity and sustained interest in learning.

Customer Sales & Behavior Analytics Dashboard | [Link](#)

- Built an end-to-end data analytics pipeline analyzing customer shopping behavior and sales performance to generate actionable business insights.
- Performed data cleaning, EDA, and feature engineering in Python (Pandas, NumPy, Matplotlib) on Google Colab; modeled relational data and wrote analytical SQL queries to extract KPIs.
- Designed an interactive Power BI dashboard with DAX measures, slicers, and drill-downs covering customer segmentation, churn patterns, subscription impact, and revenue trends.
- Delivered a structured analytical report and business-style presentation with strategic recommendations for improving retention and marketing targeting.

CERTIFICATIONS

- Software Development Intern Role Certification - **HackerRank**
- Data Structures and Algorithms in C/C++ - **Pregrad**
- Advanced Data Structures and Algorithms - **CodeChef**
- Design and Analysis of Algorithms certification - **NPTEL**
- Solutions Architecture Job Simulation - **Amazon AWS**
- Data Analytics Job Simulation - **Delloite**
- Software Engineering Job Simulation - **JP Morgan**
- GO Language - Intermediate - **HackerRank**

HONORS & AWARDS

- Achieved Dean's List recognition for maintaining a GPA above 9.0 for four semesters, showcasing consistent academic excellence.
- Active member of ACM Club, responsible for organizing, managing, and hosting various campus events and student activities.
- 2X hackathon winner and selected for nationwide Smart India Hackathon 2025
- Awarded and paid for a buddy mentorship program for teaching core subjects to students
